

GUTS

FINTECH 2017

we eliminate ticket-fraud and
overpriced tickets

PROBLEM

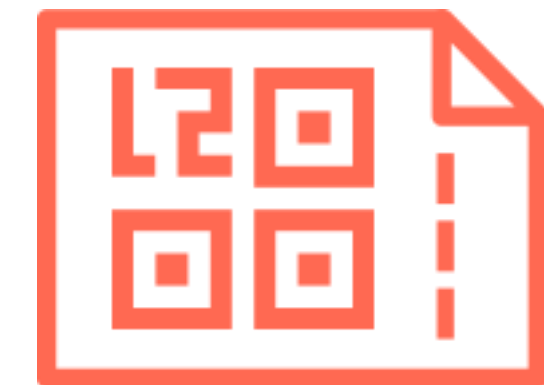

people are paying outrageous prices for tickets that may not even be valid

30% of tickets are resold with a mark-up between 100% and 250% *

for high-end concerts that's 65% resold with staggering mark-ups up to 700% *

paper & ink isn't sufficient to secure authenticity & ownership of tickets

* Estimated numbers by Europe Economics (2009)

SOLUTION

smart-tickets that utilize blockchain, encryption and mobile technology in a modern and user-friendly way

Blockchain makes our tickets smart

Ownership & properties are registered in blockchain

Tickets are linked to mobile phone

Tickets cannot 'live' outside blockchain.

PRODUCT

all the tools necessary for selling,
reselling & scanning digital smart-
tickets

access to real-time data and
insights into the actual ticket-
owners

CURRENT STATUS

signed contract with
seed investor

testing our MVP
with small events

scaling up & running
publicly in Q4, 2017
